

INSTALLATION INSTRUCTIONS

Tools You Will Need

Drill

Pencil

Phillips
Screwdriver

Level

Claw Hammer

Maintenance:

Your new shower system is designed for years of trouble-free performance.

Keep it looking new by cleaning periodically with a soft cloth. Avoid abrasive cleaner, steel wool, and harsh chemicals as these will dull the finish and void your warranty.

Exploded Drawing

- 1 Outlet connection
- 2 Mounting Kit x2
- 3 Metal Hose
- 4 Handheld Shower
- 5 Shower Holder
- 6 Grab bar
- 7 Flange x2

A

*The installation direction must be consistent with the diagram. See the green label.
*Screws MUST be mounted into a wood stud for secure installation.

B

C

Place the grab bar on to the wall where desired so that the mounting flange is positioned over a wood stud. Use a level to verify desired placement.

D1

With a pencil, mark three of the mounting locations on each of the two grab bar flanges. Two marks to be made above the grab bar in the area indicated. The third mark to be made below the grab bar in the area indicated.

D2

D3

To ensure proper installation, the Mounting flange must have a screw in each of the positions indicated in the illustration.
