Note: Installers should always use the template that is provided with each sink when making cuts in a countertop. The dimensions provided in the Installation Manual / Spec Sheet are a general reference for the product size. They should not be used to make cuts in countertops for sink installation. Typical production variances can cause slight differences in the dimensions of finished pieces. Therefore, each countertop cutout should be inspected & tested with the sink that is to be installed, before further countertop cuts are made. Please contact an associate if you did not receive or cannot find the cutout template for your sink.

WARRANTY

10-Year warranty. Visit stream33.com for details.
